Modular Seal Links for pipe through *wall* sealing
WA-LU Models for all pipe sizes

Higher pressure pipe sealing 36 psi (2.5 bar) permanent water tight
80 ft. head solutions-providing pressure reserves for most installations

WA-LU modular seal links, provide watertight sealing for pipes that penetrate through a concrete wall or floor. Interlinking seals fill the annular space around the pipe. WA - LU Seals are distributed by Westatlantic Tech Corp.

WA-LU pipe seals are a higher 36 psi assembly, easy to install after the pipe is through the wall. LU modular seals provide a pressure class unit with a higher head resistance.

Sealing elements are EDPM, NBR or Silicone, with stainless steel or galvanized bolting.

EPDM element link-seal pressure seal is resistant to most inorganic acids and alkali, and some organic chemicals (acetone, alcohol, ketone)

NBR (Nitrile) element has the best oil resistance qualities of all the natural and synthetic rubber materials. It is superior to neoprene and recommended for all locations where there is constant or intermittent exposure to oil, grease or gasoline.

Silicone element link seals are used where temperature extremes are present.
