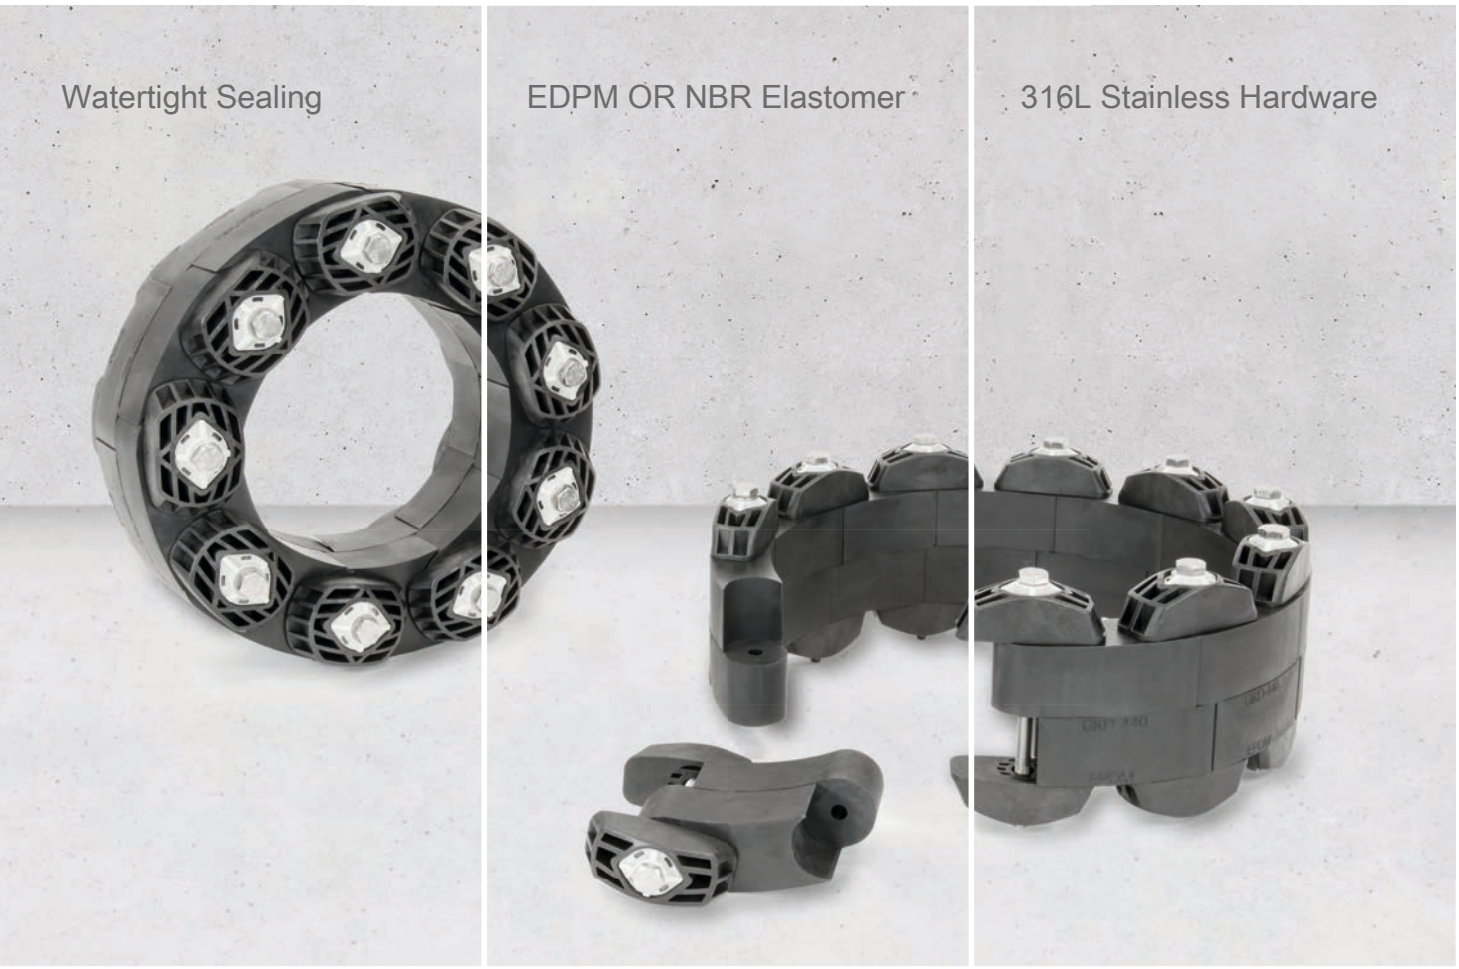
Watertight Sealing of pipe through Concrete walls



http://www.westatlantictech.com/pages2/watertight-modular-seals.php

Optimum seal feed back on each bolt. Bolt heads are locked in place.
No leaks - all links can be visually checked for correct tightening.
No returns for re-tightening - No special tools required

Upgrade pipe penetration sealing with integrated installation control

WA-Modular Seals

Maximum Installation Security

Yellow. Safe. Installed.

Inspection made easy

Westatlantic
Tech Corp.

The modular seal with integrated installation control

Features and technical data:

- integrated installation control – no torque control key required
- no retightening required
- nuts moulded in pressure plate, therefore no loose parts
- high quality rubber in EPDM or NBR
- all metal parts made of high quality stainless steel V4A (AISI 316L)
- optimized geometry
- tightness up to 5 bar approved by Lloyds register

Watertight sealing for pipes through core drill holes or wall sleeves.

Torque window indicators for optimum tightness. Sizes to fit all American & International pipe sizing.

Annular space (mm)		Carrier pipe Ø (mm)		Required wall thickness (mm)	Article code
from	to	from	to		
19,5	22,5	73,5	250	100	WAGKD 300

Yellow. Safe. Installed.

Have the installation procedure in view at all time with integrated inspection window

untightened... ...tightened

optimized bolt geometry

+

special rubber

+

lubricant

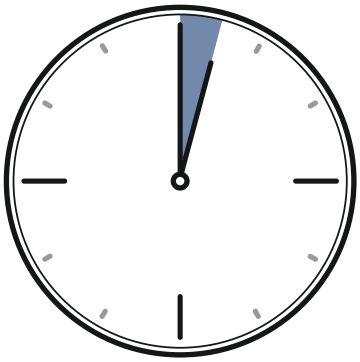
=

no retightening required

The combination of a optimized bolt geometry, a special rubber and the Hauff lubricant ensures that the modular seal is installed after a one-time tightening. Your advantage – no waiting time and no time consuming repeated retightening

NEW:

1. installation time



UNTIL NOW:

1. installation time
2. waiting time
3. additional installation time
